Chapter Alpha

This fixture exercises `counter(page)` / `counter(pages)` in `@bottom-center` and `counter(chapter)` in `@top-right`. The chapter counter increments per h2.

Page 1 should read "Ch. 1" in the top-right and "Page 1 of N" in the bottom.

Filler 1 to push content past page 1.

Filler 2 — multi-line content
extends the height further
across more lines
so the page boundary lands
well inside the body content.

Filler 3 — additional text to make sure Chapter Alpha overflows page 1 and the counter values for page 2 are exercised under "Ch. 1" since the next h2 has not appeared yet.

Filler 4 — even more content. The chapter counter should still be 1 on page 2 because `counter-increment` only fires when a new h2 is encountered.

Filler 5.

Filler 6.

Filler 7.

Chapter Beta

Chapter Beta starts on a new page. `counter(chapter)` must read "2" here.

Top-right should read "Ch. 2" on this page.

Bottom-center should read "Page N of N".
